Mashpee (Barnstable)

Mashpee is a town in Barnstable County with 4,690 residents aged 65 and older. Compared to state average rates, older residents in Mashpee have lower rates of tooth loss, Alzheimer's disease or related dementias, chronic kidney disease, congestive heart failure (CHF), diabetes, liver disease, tobacco use disorders, and schizophrenia. However, they report higher rates of cataract, fibromyalgia/chronic pain/fatigue, glaucoma, hypertension, osteoarthritis/rheumatoid arthritis, osteoporosis, prostate cancer, stroke, and high cholesterol. They are also more likely to report excessive drinking. Older Mashpee residents are more likely to take the health promotion steps of engaging in regular physical activity, meeting CDC guidelines for aerobic exercise, having an annual physical exam, receiving a pneumonia vaccine, and receiving an annual dental exam. Community resources to support healthy aging include an adult day health center, two assisted living facilities, a COA, a public library, 21 primary care providers, and a skilled nursing facility.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		15,144	6,984,205
Population 60 years or older as % of total population		39.7%	23.8%
Total population 60 years and older		6,012	1,661,076
Population 65 years or older as % of total population		31.0%	17.1%

% 65+ hospice users		2.4%	2.8%
% 65+ hospice users as % of decedents		42.6%	44.0%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Massachusetts Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
