

Newton (Middlesex)

Newton is a city in Middlesex County with 16,540 residents aged 65 and older. Older residents fare better than state average rates with lower rates of tooth loss, asthma, atrial fibrillation, chronic kidney disease, COPD, colon cancer, CHF, diabetes, heart attack, hypertension, ischemic heart disease, liver disease, peripheral vascular disease, pressure ulcer, stroke, substance and tobacco use disorders, anxiety disorder, PTSD, and high cholesterol. However, they have higher rates of benign prostatic hyperplasia, breast cancer, cataract, fibromyalgia, glaucoma, migraine, osteoporosis, and prostate cancer. They are more likely to do physical activity, meet the CDC guidelines for strength/aerobic activity, receive flu and shingles vaccines, and have a regular doctor and annual dental exams. Community resources include a COA, 3 adult day health centers, 6 home health agencies, 4 hospice agencies, 1 hospital, 5 assisted living facilities, 1 public library, 64 primary care providers, 4 skilled nursing facilities, and a public university/community college. Newton is an AARP Age-Friendly Community.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		88,453	6,984,205
Population 60 years or older as % of total population		25.1%	23.8%
Total population 60 years and older		22,232	1,661,076
Population 65 years or older as % of total population		18.7%	17.1%
Total population 65 years and older		16,540	1,195,589
% 65-74 years		56.7%	58.4%
% 75-84 years		29.6%	28.1%
% 85 years or older		13.6%	13.4%
% 65+ population who are female		55.4%	56.2%
% 85+ population who are female		63.7%	66.6%
Race and ethnicity of the population 65+

% 65+ hospice users		2.7%	2.8%
% 65+ hospice users as % of decedents	*	51.4%	44.0%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Massachusetts Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
