

Belmont (Middlesex)

Belmont is a town in Middlesex County with 4,763 residents aged 65 and older. Compared to state average rates, older residents report lower rates of asthma, atrial fibrillation, chronic kidney disease, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), diabetes, hypertension, ischemic heart disease, liver disease, lung cancer, peripheral vascular disease, pressure ulcer, stroke, substance and tobacco use disorders, anxiety disorder, and high cholesterol. However, they have higher rates of breast cancer, cataract, glaucoma, and osteoporosis. Belmont residents are more likely to engage in physical activity and receive flu and shingles vaccines. Community resources to support healthy aging include a COA, one public library, six primary care providers, one hospital, and one skilled nursing facility. Belmont is a designated AARP Age-Friendly Community.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		26,997	6,984,205
Population 60 years or older as % of total population		23.5%	23.8%
Total population 60 years and older		6,339	1,661,076
Population 65 years or older as % of total population		17.6%	17.1%
Total population 65 years and older		4,763	1,195,589
% 65-74 years		58.3%	58.4%
% 75-84 years		29.3%	28.1%
% 85 years or older		12.4%	13.4%
% 65+ population who are female		56.0%	56.2%
% 85+ population who are female		74.2%	66.6%
Race and ethnicity of the population 65+			
% White		87.2%	86.3%
% African American	*	1.1%	4.4%
% Asian	*	8.5%	4.0%
% Other race(s)		3.3%	5.3%
% Hispanic		3.3%	4.8%
# 55+ who are Native American / Alaskan		0	3,537
Marital status of the population 65+			
% married	*	63.5%	54.0%
% divorced/separated	*	7.4%	15.8%
% widowed		21.5%	21.1%
% never married		7.7%	9.0%
Education of the population 65+			
% with less than high school education	*	7.2%	12.7%
% with high school or some college	*	30.4%	50.3%
% with college degree		19.6%	18.1%
% with graduate or professional degree	*	42.8%	18.9%
% 65+ population who speak only English at home	*	76.3%	83.1%
% 65+ population who are veterans of military service	*	7.4%	12.7%

% 65+ getting Medicaid long term services and supports	*	1.1%	3.4%
% 65+ hospice users		3.0%	2.8%
% 65+ hospice users as % of decedents		43.2%	44.0%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Massachusetts Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
