

Brockton (Plymouth)

Brockton is a city located in Plymouth County with 14,142 residents aged 65 and older. Compared to state average rates, Brockton has lower rates of benign prostatic hyperplasia, breast cancer, cataract, endometrial cancer, osteoarthritis/rheumatoid arthritis, osteoporosis, peripheral vascular disease, and prostate cancer. However, they have higher rates of tooth loss, Alzheimer's disease, anemia, asthma, chronic kidney disease, COPD, CHF, diabetes, glaucoma, hypertension, liver disease, migraine, stroke, substance and tobacco use disorders, anxiety disorder, PTSD, and schizophrenia. They are more likely to have a regular doctor but are less likely to engage in physical activity. Community resources to support healthy aging include a COA, four adult day health centers, three community health centers, nine home health agencies, one hospice agency, one assisted living facility, two hospitals, three public libraries, five skilled nursing facilities, three public universities or community colleges, and 145 primary care providers. Brockton is an AARP Age-Friendly Community.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate

% 65+ hospice users		2.7%	2.8%
% 65+ hospice users as % of decedents	*	38.0%	44.0%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Massachusetts Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
