Chatham (Barnstable)

Chatham is a town in Barnstable County with 3,222 residents aged 65 and older. Compared to state average rates, older adults in Chatham have lower rates of tooth loss, Alzheimer's disease or related dementias, asthma, chronic kidney disease, congestive heart failure (CHF), diabetes, lung cancer, schizophrenia, and substance and tobacco use disorders. However, they have higher rates of atrial fibrillation, benign prostatic hyperplasia, cataract, glaucoma, osteoarthritis/rheumatoid arthritis, peripheral vascular disease, prostate cancer, and high cholesterol. Chatham residents are proactive about their health, with higher rates of physical activity and annual dental exams. Community resources to support healthy aging include a COA, one hospice agency, two public libraries, two primary care providers, one assisted living facility, and one skilled nursing facility.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate

% 65+ hospice users as % of decedents	*	60.1%	44.0%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Massachusetts Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
