

Dedham (Norfolk)

Dedham is a town in Norfolk County with 5,179 residents aged 65 and older. Compared to state average rates, older adults in Dedham have a lower rate of tooth loss and PTSD. However, they experience higher rates of hip fracture, Alzheimer's disease or related dementias, anemia, atrial fibrillation, cataract, chronic kidney disease, congestive heart failure (CHF), fibromyalgia/chronic pain/fatigue, hypertension, ischemic heart disease, osteoarthritis/rheumatoid arthritis, osteoporosis, peripheral vascular disease, pressure ulcer, and depression. Dedham residents are more likely to take the health promotion steps of being screened for high cholesterol and have annual dental exams. Community resources to support healthy aging include a COA, one adult day health center, three home health agencies, one hospice agency, 61 primary care providers, one skilled nursing facility, three assisted living facilities, one hospital, and two public libraries. Dedham is a designated AARP Age-Friendly Community.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		25,150	6,984,205
Population 60 years or older as % of total population		28.3%	23.8%
Total population 60 years and older		7,113	1,661,076
Population 65 years or older as % of total population		20.6%	17.1%
Total population 65 years and older		5,179	1,195,589
% 65-74 years		55.1%	58.4%

% 65+ hospice users	*	3.4%	2.8%
% 65+ hospice users as % of decedents		43.8%	44.0%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Massachusetts Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
